

The AAR made it easy for members to purchase Renewable Energy Credits when traveling to the 2010 Annual Meeting. By simply clicking a box on the online registration page, members could choose to give \$15 to *NativeEnergy*.

The AAR is pleased to have collected a total of \$5,070 from 338 participants in this carbon offset program. Along with a \$250 donation for the AAR's staff travel, we sent *NativeEnergy* a check in the amount of \$5,320. We kept 379 tons of CO2 out of the air with our carbon offset program last year – let's top that this year!

The total number of people registered for the Annual Meeting came to 4,819 and they were given the option of participating in the program. Of these, 338 participated – for a final total of seven percent participation.

The AAR's Sustainability Task Force selected *NativeEnergy* because of its commitment to reducing greenhouse gases while supporting its sustainability projects.

Native

Energy is one of the top carbon offset companies in the United States and the world.

Native

Energy helps build Native American, farmer-owned, community based renewable energy projects that create social, economic, and environmental benefits.

Native

Energy helps finance and build new, clean, and renewable energy projects that help create sustainable economic benefits for Native Americans, Alaska Native villages, and other local communities, and that help America's family farmers compete with large agribusiness. These projects will reduce the depletion of fossil fuels and lower greenhouse gas emissions.

The AAR and SBL are continuing this program in 2011. We encourage you to make this inexpensive commitment to helping make our meetings more environmentally friendly.
